

Practical Friday (In Groups of 4/5)

From the knowledge that you have gained so far on HTML basics, design the below website and follow the exact layout.

Use your own images and content.

The navigation links must appear on both pages and function correctly. About Us page should only have an H1 element that says ABOUT US and the 2 links.

There are lines, one below the links and one before the footer, research on what that HTML element is called.

My Favourite Cars™

[Home](#) | [About Us](#)

Welcome to My Favourite Cars

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Phasellus nec justo in augue suscipit vestibulum. Nulla facilisi. Integer sit amet arcu ut sapien efficitur bibendum.

This website is dedicated to the cars I love the most. Explore different models, learn more about their features, and see why they are awesome!
